

We Are Open For Business

Sunland Home Care is dedicated to serving our aging population and is taking steps to further protect our patients and care providers from COVID-19. Our team is actively following the recommendations from local, state and federal officials with respect to COVID-19.

We know those most affected by this disease are those of advanced age and those with underlying healthcare conditions. The following steps are being taken to reduce the impact of this illness on our patients and care providers:

ASSURING CONTINUITY OF CARE

- Sunland Home Care services continue to be provided to patients on a daily basis.
- Sunland Home Care services may help seniors to remain at home by promoting social distancing.
- Sunland Home Care caregivers are trained professionals who can assist older adults with items such as grocery shopping, and medication pick up, reducing interactions with large groups of people.
- Sunland Home Care caregivers can also facilitate Telehealth Services, connecting patients with their doctors or clinical teams through Skype or FaceTime calls.

STAFF TRAINING MEASURES

We communicate frequently with our Care Providers and Management Team members to provide training on COVID-19, including the following:

- Recognizing Signs & Symptoms
- Safety Procedures
- Standard Universal Precautions
 - Proper Hand Hygiene
 - Practicing Cough Etiquette
 - Using Personal Protective Equipment
- Early detection and reporting of COVID-19
- Best Practices for Infection Control

REMOTE NURSE MONITORING PROGRAM

Sunland Home Care is establishing a Remote Nurse Monitoring program to actively monitor both patients and care providers on a weekly basis. We will have Registered Nurses reaching out to every Client and Caregiver, screening for potential signs and symptoms of COVID-19.

Following CDC Recommendations: Caregivers will not work with clients for at least 14 days (as recommended by the CDC) or until cleared by a medical provider if they:

- Are showing signs or symptoms of COVID-19
- Have recently traveled from a high risk area as listed by the CDC
- Have been exposed to a confirmed case or facility where COVID-19 is being treated
- We will not place any caregiver who has symptoms of the illness on any assignment.
- We are working to actively screen employees on a regular basis using our Remote Nurse Monitoring program.

ENCOURAGING EARLY DETECTION AND REPORTING

Clients and their family members have been updated on these measures and have been instructed to inform their Care Manager if they notice any of the following:

- Have any of the signs & symptoms of COVID-19
 - Fever over 100°
 - Difficulty Breathing
 - Cough
- Have traveled to any of the areas impacted by COVID-19
- Have been in contact with any person who has presented with the symptoms listed above
- Are being treated for possible COVID-19
